Make Applications More Valuable

Embed Caché. The gold standard of object databases.

When you embed Caché in your applications, they become more valuable. Caché dramatically improves speed and scalability while decreasing hardware and administration requirements. This innovative object database runs SQL queries faster than relational databases. And with InterSystems' Unified Data Architecture™ technology, Caché eliminates the need for object-relational mapping. Which means Caché doesn't just speed up the *performance* of applications, it also accelerates their development. Caché is available for Unix, Linux, Windows, Mac OS X, and OpenVMS – and it also supports MultiValue development. Caché is deployed in more than 100,000 systems ranging from two to over 50,000 users. Embed our innovations, enrich your applications.
